

EN:

Environmental labeling

We want to provide all customers with the necessary information to correctly sort and dispose of the packaging of our products in compliance with Legislative Decree 116/2020. For this reason, all relevant guidance for proper waste separation of packaging materials is collected on this page.

If you have purchased one of our products, please scan the QR code on the hangtag or on the packaging to receive precise instructions on how to correctly identify the material and which recycling stream it belongs to. Please also check any additional local disposal rules issued by your municipality.

In the table below, for each packaging type, you will find a reference image, a short description of the material and the indication of which waste sorting category it belongs to.

PRODUCT EXAMPLE	MATERIAL DESCRIPTION	MATERIAL COLLECTION	RECYCLING CODE
	Cardboard Box	Paper	
	Bag	Plastic	
	Adhesive Tape	Plastic
